## THE PROGRAM

"By learning to accept your own death, you lead a much fuller and happier life. Once you realize there is a time limit in which you must accomplish your goals, you begin to live your life more completely," states MRS. SHEILA BENTER, a lecturer on death and dying. She holds a Master's degree with an emphasis in death education, and is having a profound effect on many people's attitudes about death.

In America, she stresses, the attitude toward death has been to deny the subject, and to refuse to talk about it. She emphasizes the importance of accepting our own death in order to clear the path for achieving desires and goals today and not postponing them until tomorrow. Research has shown that people who learn to get in touch with their feelings about death at an early age, live mentally healthier lives. "Live each day to its fullest and make every moment count!" Mrs. Benter, who plans to pursue her doctorate in this area, has transferred these thoughts to youth and adults.

Her knowledge and presentation of this somewhat controversial subject has been met with overwhelming acceptance, not only by her students and their parents, but by her colleagues as well. Her class is creating new and exciting concepts for life and living, with the emphasis on accepting one's own death in order to clear the way for accomplishing goals TODAY and not TOMORROW. Sheila has put her message into action by becoming a marathon runner and dance exercise instructor. She has become living proof of her philosophy.

## PREZ SEZ

WHERE DO WE GO FROM HERE.....?

Yesterday is already over...Today is now.. and tomorrow will be here, for sure. What is happening in our lives today has a great deal to do with what we may--or may not--have planned in one of those yesterdays. Our Club's activities happen because there are many who participate in the planning process and then in the 'doing' too. While much has been accomplished, the vitality of the Club depends upon the drive, action, imagination, and interest of all members.

*Webster says of the word vitalize: 'to make vital, to give life to. (2) vigor, imagination.' Our actions in the San Diego community and the attractiveness of our Club depend upon the vigor of the membership. Motivation comes first, activities then follow.*

These comments are for those who may be thinking about what our Club does and possibly why they are not more involved. The answer is: we need you to come forward, have ideas, be willing to do something about them, and then carry on. You will find a welcome, offers of support, enthusiasm, and your own rewards of service. Don't wait; project yourself. This concept generates vitality. Darkness is overcome by light. The more who fire up their candles, the greater the vision for us all to see the way. Do you have a match?

\*\*\*\*\*

WE OFTEN search for complicated answers to problems when the truth is under our noses all the time. Henry Ford was once asked by an insurance agent whom he had known for many years why he never got any of Ford's business. "You never asked me," was Ford's reply.

## MEMBERSHIP

### NEW MEMBER MOMENTUM & THE NEED FOR MORE

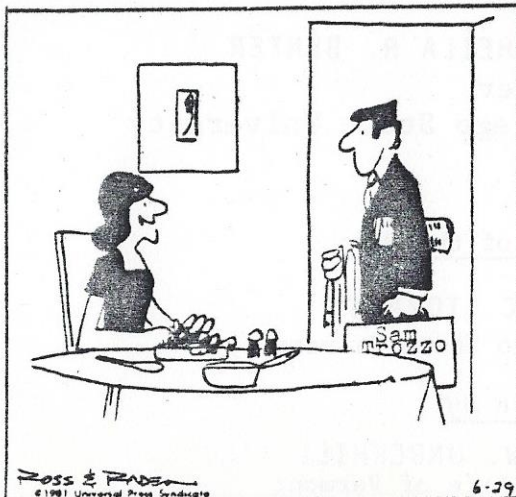

Our Club wants, requires, looks for, cares about, and must have a continuous emphasis on membership. We are a very big club.... which means things happen in an over-sized way. The membership, to be maintained, must have new individuals added to replace those who must move on for whatever reason. Be proud to bring a guest to a meeting and propose a new member. You'll be glad you did!
